

WOLFFKRAN

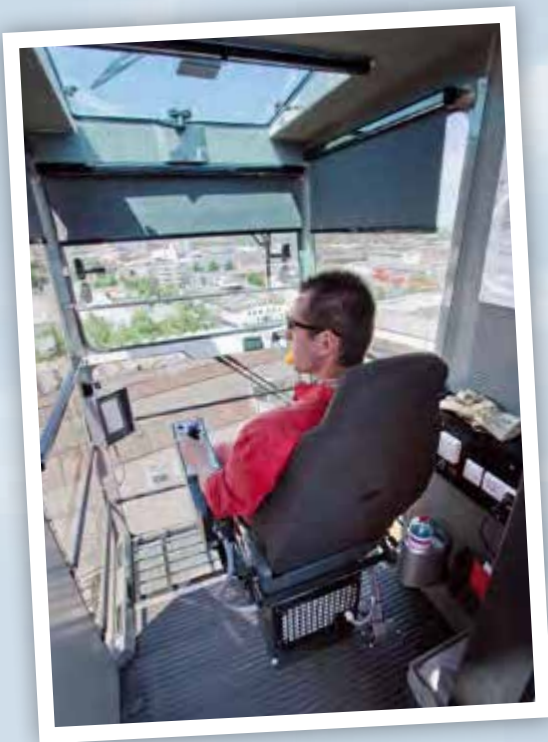

New: WOLFF CAB – the top address for crane operators.

WOLFF CAB: The cranesational cabin.

The crane cabin WOLFF CAB sets new standards with regard to comfort and functionality on the tower crane. Developed to meet the demands and needs of today's crane operators – for increased safety and productivity on the construction site.

Ideal visibility and overview

- » optimized partition of the front window, motor of the windscreen wipers positioned on the side, side windows constructed of a single pane
- » tinted glass and quality standard blinds for best possible glare protection

Ergonomic seat

- » seat adjustable horizontally and vertically to all individual body heights
- » ample length adjustment to guarantee perfect downward view

Comfort all around

- » radio with SD/USB port and Bluetooth hands-free equipment
- » additional shelves and storage space
- » six sockets and one beverage cooler/heater

Effective heating

- » adjustable air vents along the side and front windows
- » cabin can be heated even when in radio control operation

Optimal controls and operating elements

- » ergonomic armrests and smooth-running joysticks for fatigue-free working
- » flatter buttons and bellows for effortless cleaning and maintenance of the control panels
- » easy to read 7 inch touchscreen color monitor in five languages (German/English/French/Italian/Dutch)
- » all crane data displayed on one page, user-friendly navigation through the menu

Available extras

- » air conditioning
- » touchscreen panel PC (for camera system, anti-collision system, operating manuals etc.)
